(54) SMALL SIZED ELECTRONIC DEVICE

(57)Abstract:

PURPOSE: To prevent an external beautiful appearance from being lost due to the presence of a hand strap mount part by chamfering upper end corners of a rear panel of an outer case and forming a hole of nearly L-shape penetrated through the rear panel from the chamfered part to the rear side of the outer case.

CONSTITUTION: A resin case forming an outer enclosure of a portable radio equipment 1 is made up of a front panel 2 and a rear panel 3 and upper corners in the middle of an upper end of the rear panel 3 are chamfered (4) and a flat hole 5 whose cross section is nearly L-shape is formed integrally from the chamfered part 4 to the rear side. Then the lateral width of the chamfered part 4, the shape and size of the flat hole 5 are selected in matching with the dimension of a hand strap 6. In this case, since the upper end corners are chamfered as the chamfered part 4, the hand strap 6 is easily

penetrated to the flat hole 5 from the part. Furthermore, since the flat hole 5 is formed in the rear panel 3 formed integrally with the resin as the insertion hole of the hand strap 6, the part between the inside of the portable radio equipment 1 and the flat hole 5 is shut by the resin and the possibility of intrusion of rain or dust or the like to the inside is precluded.
